At the very least the fish consumption advisory needs to be lifted at the end of the cleanup. Help ensure that this Osprey can fish for clean fish, and people can consume fish without increased cancer risk!!

I've used this river for recreation and fish consumption over the last 20 years. I don't eat fish on a regular basis, and I don't eat resident fish because of the contamination in the river (only salmon and sturgeon), but I'd sure like to know what fish I do eat from the Willamette isn't a threat to my health or that of my family and friends. I know there are lots of people who use this river and it's tributaries for fish to supplement their diets and they are living hand to mouth in this economy. Let's do the right thing and clean up this river. It's a black mark on the city of Portland and the PNW which prides itself on being eco and clean!
